

AES RAPTOR **CONTRACTOR BASE 2™** PATENT PENDING

Perimeter Fall Protection For Contractors & General Construction

The AES Raptor Contractor Base 2™ Rail System is designed specifically for the safety needs of contractors and the general construction industry. This reusable system is designed as guardrail protection for highway and bridge reconstruction projects. The railing system increases productivity, offers greater visibility than cable systems and greater protection than wood rails.

- **Fast & Easy Set Up!**
Installs 3x faster than wood rails
- **Re-Usable & Eco-Friendly**
"Green" alternative to wood rails
- **Use with Parapet Clamp -**
No holes required!
- **Includes Toe-Board Attachment**
- **Stronger than Wood Guard Rails**
- **More Visible than Cable**
