

AES RAPTOR FALL RESTRAINT TIE-OFF RINGS™

PATENT PENDING

For Perimeter Fall Protection

AES Raptor has realized the need to have extra tie-off points for crew members that are directly assisting the crew working the leading edge. Taking that into consideration, we have introduced an optional Fall Restraint Tie-Off Rings that can be installed on either side of the Fall Arrest Engagement Arm. Up to two anchors can be installed on your existing R1000s or we can factory install them with your purchase of a new R1000 or TriRex.

ITEM: APX-000-09

- *Easy to Install*
- *Two rings can be installed on existing R1000s*
- *Can be factory installed on new R1000 or TriRex*

AES RAPTOR

FALL RESTRAINT TIE-OFF RINGS™ PATENT PENDING

Installation of the Fall Restraint Tie-Off Rings™ is quick and easy.

INSTALLATION INSTRUCTIONS

1. Hook Fall Restraint Tie-Off Ring over Frame Rail
2. Secure tightly using the supplied 3/4" x 4" Bolt

- * Only use the Fall Restraint Tie-Off Ring on the side of the cart that arrest tie-off rings are located.
- ** Fall Restraint Tie-Off Rings must be used in a configuration that will not allow the user to fall.

AES Raptor Fall Restraint Tie-Off Rings™ For Perimeter Fall Protection

Fall Restraint Tie-Off Rings must be used in a configuration that will not allow the person attached to them to fall.

MAXIMUM TIE-OFF POINTS PER SYSTEM:

R1000

- 2 Fall Arrest
- 2 Fall Restraint
- **Total of 4 People at any given time**

TriRex

- 3 Fall Arrest
- 2 Fall Restraint
- **Total of 5 People at any given time**

*NOTE: If other options such as the Raptor Alert or the Raptor Rescue System are installed on the R1000, it may restrict the use of the Fall Arrest Anchors.
