

AES RAPTOR RAPTOR RESCUE™

PATENT PENDING

Rescue Retrieval System

The employer shall provide for “prompt” rescue of employees in the event of a fall or shall ensure that employees are able to rescue themselves.

OSHA Standard 1926.502(D)(20)

What is “prompt”? OSHA points to research indicating that suspension in a fall arrest device can result in unconsciousness followed by *death in less than 30 minutes*. An Air Force study shows that volunteers suspended in harnesses experienced adverse health effects in as little as 12 to 15 minutes. Some safety experts say damage can be done *in as little as 5 or 6 minutes*.

- *Easily adapts to all models of the R1000 or the new TriRex*
- *Quick release for the rescue winch (allows winch to be stored in job box away from weather and theft)*
